

Business Link Sage Advisory Course

Outline of the course

A half day advisory course which includes hands-on real-life exercises to help you understand the concept of using Sage Line 50, and the impact of a structured approach to implementing Sage software. The aim of the course is that you will be able to understand:

- how Sage Line 50 is structured
- what the Purchase, Sales and Nominal Ledgers are
- how customer and supplier records can be used effectively
- how using the credit control and cash flow functions can help manage business
- the importance of a well structured Nominal Ledger
- what the Chart of Accounts is and why it is central to reporting
- which management reports are useful, and what they tell you
- how to report into Excel
- what impact corrections have
- why check and backing-up data is important

During the advisory course you will have time to ask questions from our Sage experts as we guide you through the best business use practices of using the software.

You will also have the opportunity to view the latest version of Sage Line 50, which is due for release in August, as well as Sage Manufacturing for Line 50 and Sage's latest venture Sage Start-Up – a subscription basis solution for helping start-ups plan, start and run their business.

Sage

Sage is the world-leading supplier of accounting, payroll, manufacturing and CRM software for small and mid-market companies. From start-ups to growing businesses, over 500,000 UK companies rely on Sage to help run their business.

Sage Line 50

Sage Line 50 is a powerful business management system, designed to meet the needs of a wide range of UK companies. Sage Line 50 offers control over many areas of a business and is the UK's most successful accounting program.

Sage Line 50 Manufacturing

Sage Manufacturing Solutions for Line 50 are ideally suited to smaller manufacturers and assemblers. They are fully integrated with Sage Line 50 Financial Controller thus saving time and increasing accuracy by eliminating the need to re-key data.

accountsdirector

We are Sage specialists and because we have a wealth of experience in implementing Sage accounting solutions we know what product works best for each business. Every company is different, so we start by gaining an understanding of a particular business, what makes it tick, and what is important to it.
